

VERITROOPER

AUDIT SUITE - PILOT QUICK START

1	Verify the installer Double-click VERIFY VERITROOPER INSTALLER . Continue only if the result says VERIFIED - THE INSTALLER MATCHES . If it says Do Not Run, stop and contact your VERITROOPER representative.
2	Install Double-click VERITROOPER Audit Suite Setup . Windows may temporarily display Unknown publisher while VERITROOPER's Microsoft publisher certificate is pending. Choose More info, then Run anyway only after Step 1 succeeds.
3	Open VERITROOPER Use the new desktop shortcut named VERITROOPER Audit Suite . Your supplied activation file is installed automatically when it is kept beside Setup.
4	Start the pilot Confirm the licensed organization and enabled capabilities shown in VERITROOPER. Select the agreed workflow - Scout, SitRep, or Watchtower - and begin with a small representative input.
5	Keep the evidence Retain the generated audit package. It contains the detailed results and integrity records needed for review and follow-up.

Evaluation limits

Unless your pilot agreement says otherwise: **14 days, 5 runs shared across Scout, SitRep, and Watchtower, and up to 200 questions or evaluated interactions per run**. The paid Audit Suite is a separate, unlimited installation; keep prior evidence when moving to it.

Important boundaries

VERITROOPER produces evidence for human review. It does not certify a model, replace professional judgment, or make deployment decisions. Do not place production secrets or regulated personal data into a pilot unless your organization has approved that use.

Need help?

Contact your VERITROOPER representative and include the organization name, the screen you were on, and the exact message shown. Do not send passwords, API keys, or confidential source material.
